INVESTMENT BEHAVIOUR DASHBOARD

LEVEL 4 - EXPERT | TASKS 7-10

Prepared by: Akshay Gaikwad

Internship domain: Business Analytics

Organisation referenced in the task guide: Cognifyz Technologies

Tool: Microsoft Power BI Desktop and CSV-based analysis

Prepared from the supplied CSV, PBIX project, and Cognifyz Business Analytics internship task guide.

Task 7 — Common Information Sources

Source	Count	Share
Financial Consultants	16	40.0%
Newspapers and Magazines	14	35.0%
Television	6	15.0%
Internet	4	10.0%

Financial Consultants is most common (16, 40%), followed by Newspapers and Magazines (14, 35%), Television (6, 15%) and Internet (4, 10%).

Task 8 — Investment Duration

Duration	Count	Share
3-5 years	19	47.5%
1-3 years	18	45.0%
Less than 1 year	2	5.0%
More than 5 years	1	2.5%

The modal duration is 3-5 years (19, 47.5%); 1-3 years has 18 (45%), Less than 1 year has 2 (5%) and More than 5 years has 1 (2.5%).

Approximate mean duration: 2.975 years (about 2.98). Assumption: Less than 1 year = 0.5; 1-3 = 2; 3-5 = 4; More than 5 = 6. This is an assumption-based midpoint estimate, not an exact arithmetic mean, because duration is categorical and the final category is open-ended.

Task 9 — Expectations from Investments

Expected-return category	Count	Share
20%-30%	32	80.0%
30%-40%	5	12.5%
10%-20%	3	7.5%

32 respondents (80%) choose 20%-30%; 5 (12.5%) choose 30%-40%; 3 (7.5%) choose 10%-20%. These are expectations, not achieved or guaranteed returns.

Task 10 — Correlation Analysis

Spearman rank correlation was calculated for Age and seven numeric investment-score fields. Because the coding direction is undocumented, coefficients are interpreted only as associations between supplied numeric codes.

Variable pair	Spearman rho	Sign
Government Bonds vs Fixed Deposits	-0.530	Negative
Debentures vs Gold	-0.430	Negative
Debentures vs PPF	-0.412	Negative
Age vs Debentures	+0.364	Positive
Equity Market vs Fixed Deposits	-0.347	Negative
Mutual Funds vs Equity Market	+0.316	Positive

The strongest absolute association is Government Bonds vs Fixed Deposits (rho = -0.530). This does not prove causation. With 40 respondents and undocumented scale direction, all results are exploratory.

Additional categorical findings

Field	Most common category	Count / share
Purpose	Wealth Creation	32 (80.0%)
Invest_Monitor	Monthly	29 (72.5%)
Factor	Returns	25 (62.5%)
